SUMMARY

A short (2-4 lines) overview of your qualifications as they relate to the role you're pursuing, demonstrating you are a good match for the role with your experience, knowledge, and skills – consider adding words from the role as part of your summary.

EDUCATION

University of California San Diego (UCSD)

Degree, Computer Engineering

Expected June 2026

- Provost Honors 2022-2023

EXPERIENCE

Rogers Community Garden, San Diego, California

October/2024-April/2025

Position: Composting Intern

- Managed a three-person team, tasked with taking care of RCG's compost farm.
- Formed a connection with the UCSD Food-Coop and set up a weekly food scrap collection schedule from their restaurant.
- Collected 150lb+ of food waste weekly from various locations around the UCSD campus.
- Maintained the health of the compost piles through changes in weather (rain) and when faced with unexpected events such as when US Fish & Wildlife asked to dump 40+lb of animal remains in RCG's compost farm.
- Tracked food scrap collection using a spreadsheet keeping track of pick-up times, location, and weight.

Food Cooperative, San Diego, California

October/2023-April/2025

Position: Cook, Dishwasher

- Cooked affordable and dietary inclusive food in the Food Cooperative, open for 5 days per week, and closed during campus breaks.
- Closed the space daily, locking doors, taking out trash, and cleaning the kitchen and eating area and ensuring that the space is food safe for the next day.
- Supplied the kitchen with multiple appliances which allowed us to prepare certain recipes in half the time.
- Modified cooking methods, and waste management to reduce food waste by 70%.

Bright Up, Khobar, Saudi Arabia

June/2023-August/2023

Position: Teaching Assistant

- I worked as a teaching assistant for a young adult's educational electronics and computer science summer camp.
- Created lesson plans and scheduled daily activities for the students.
- Taught students how to use electronic components and build circuits using bread boards, and raspberry pi's.
- Guided students through camps workshop, explained and enforced safety procedures around the workshop machines we were using such as laser cutters, 3d-printers, and soldering stations.
- Guided the 20-student group I was responsible for through their electronic projects. I supported them by: debugging code, helping them use workshop machines, and with building their circuits correctly.

SKILLS & ACTIVITIES

- Technical Skills: C++, C, Java, Python, MATLAB, AutoCAD, Blender, SQL, Excel.
- Certifications: Data Collection and Processing with Python (September 2023, University of Michigan)
- Languages: Fluent in Arabic (native), English.
- Hobbies: Long distance running, Mediterranean style cooking, Gardening
